

Report

The Internal Quality Assurance Cell (IQAC) of SJM College, in collaboration with Uttunga Infotech, organized a month-long training program on Basic Computer Literacy. This initiative was designed to enhance the digital proficiency of both teaching faculty and non-teaching staff, enabling them to effectively integrate technology into their educational practices.

The training program was attended by both teaching faculty and nonteaching staff from various departments of SJM College. This inclusive approach ensured that all staff members, regardless of their role, could benefit from enhanced digital literacy.

The 30-day training program on Basic Computer Literacy conducted by IQAC in collaboration with Uttunga Infotech was highly successful in achieving its objectives. It not only equipped participants with essential digital skills but also fostered a culture of continuous learning and technological adaptation within SJM College.
